

SELECTED WORKS 2026

Danaiwit Kanthawong

Senior 3D Modeler | Full-Stack Web Developer | AI & Systems Architect

Executive Summary (3D, Full-Stack & Systems Architecture)

Senior 3D Modeler & Blender Expert specializing in precision Hard-Surface 3D modeling across architectural structures, industrial machinery, FPV drones, and medical robotics. Proven track record in blending high-end CGI and clean Quads topology with production full-stack web application engineering (React 19, Firebase) and distributed AI studio infrastructure.

Tech innovator, community founder (4.5k+ followers), and Grand Prix award-winning AI filmmaker pioneering end-to-end automated media pipelines, high-performance computing clusters, and visual storytelling.

Corporate Communications & Media Production

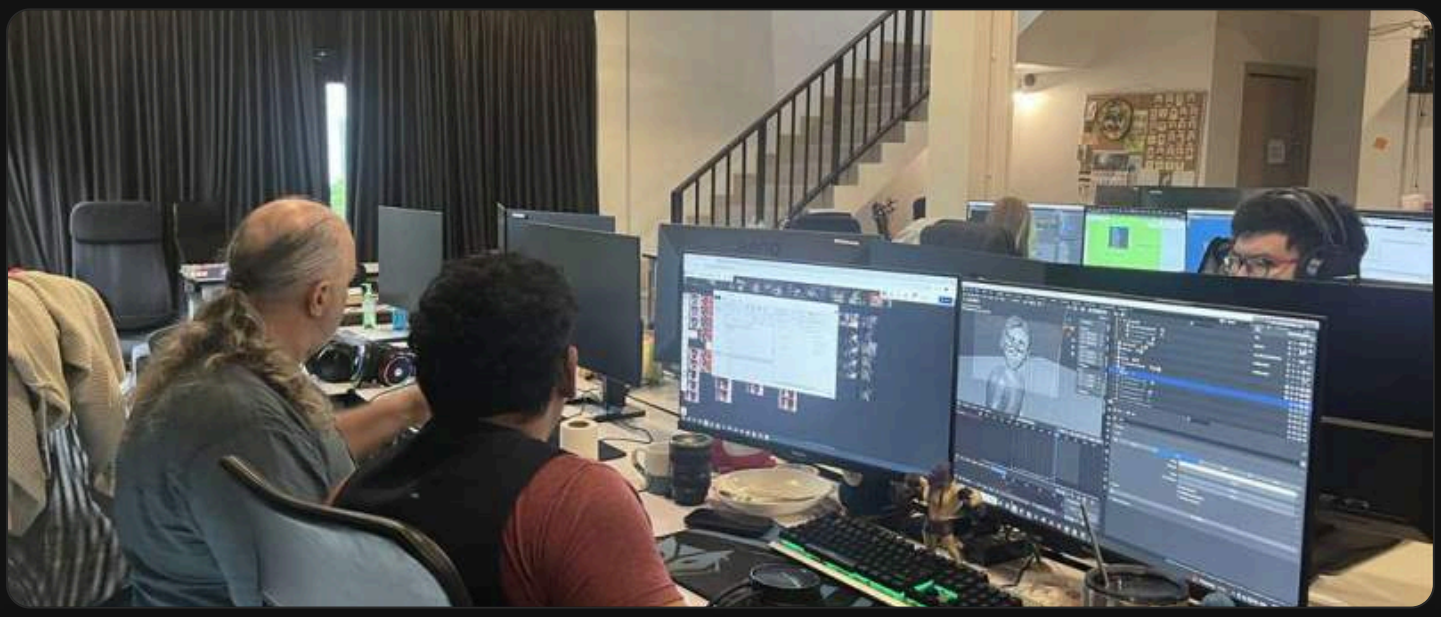

Animation Renaissance Co., Ltd.

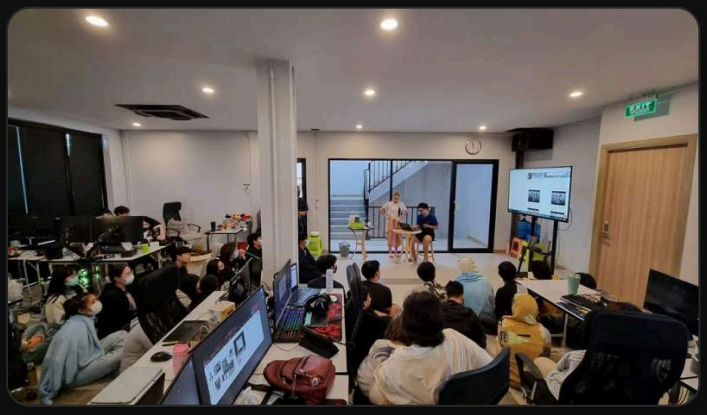

Internal PR & Cultural Management

- Internal policy communication and HR operational management
- Curating employee engagement media and fostering corporate culture

Visual Media Creator & Cameraman

- Directing promotional video production and corporate visual branding
- Lead photographer capturing and broadcasting studio stories to external audiences

Behind The Scenes & Studio Culture

Building strong internal relations

Grand Prix Winner: Best AI Short Film

Thailand International AI Film Festival (TIAIF 2026)

Grand Prix winner at the Thailand International AI Film Festival for the short film "The Stroke of Night" (co-created with Animation Renaissance), demonstrating cutting-edge AI integration in narrative and cinematic arts.

Official Certificate of Achievement

Best AI Short Film - TIAIF 2026

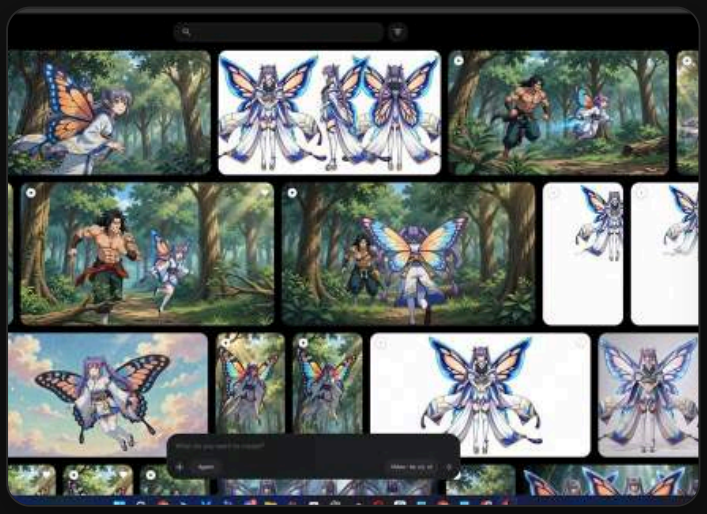

Creative Storytelling & Campaign Production

AI-Driven Visual Communications

Creative media production through cinematic short films, showcasing narrative storytelling, mood & tone direction, and impactful message delivery to targeted audiences.

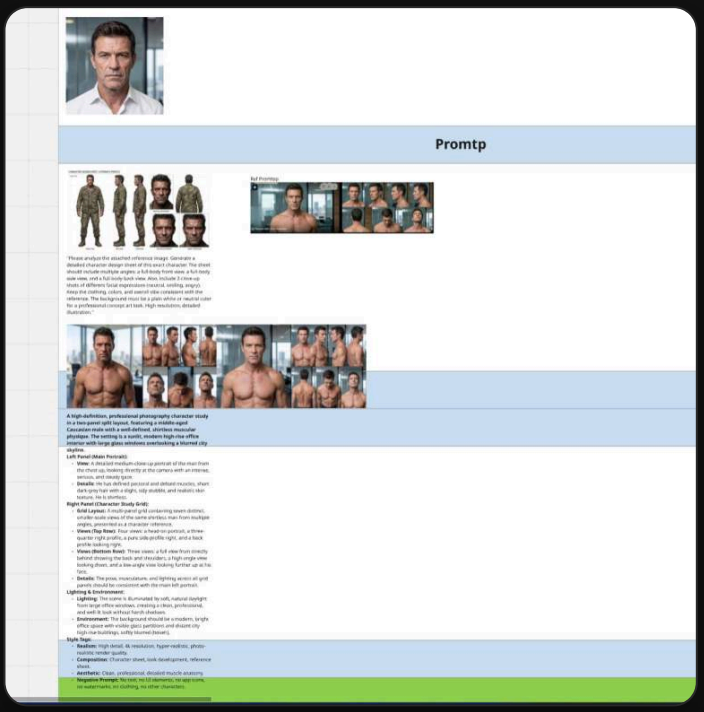

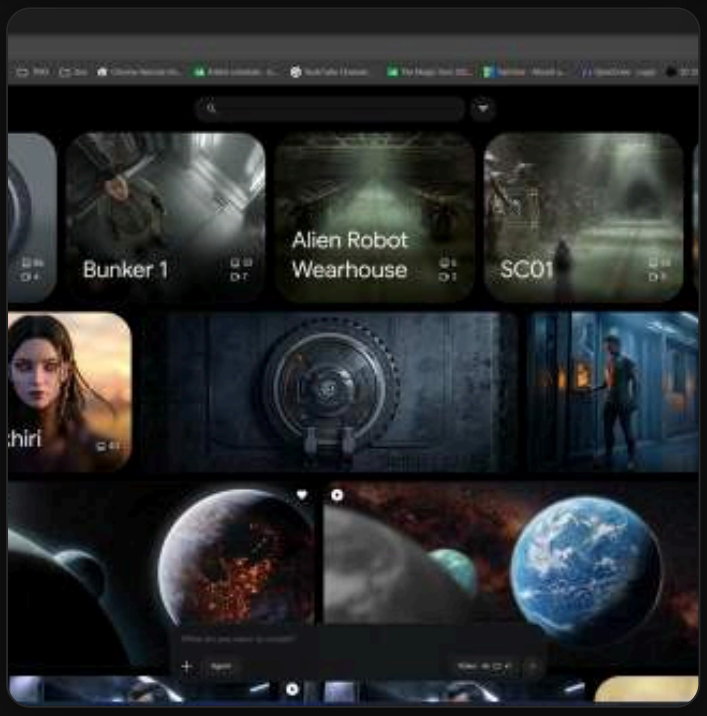

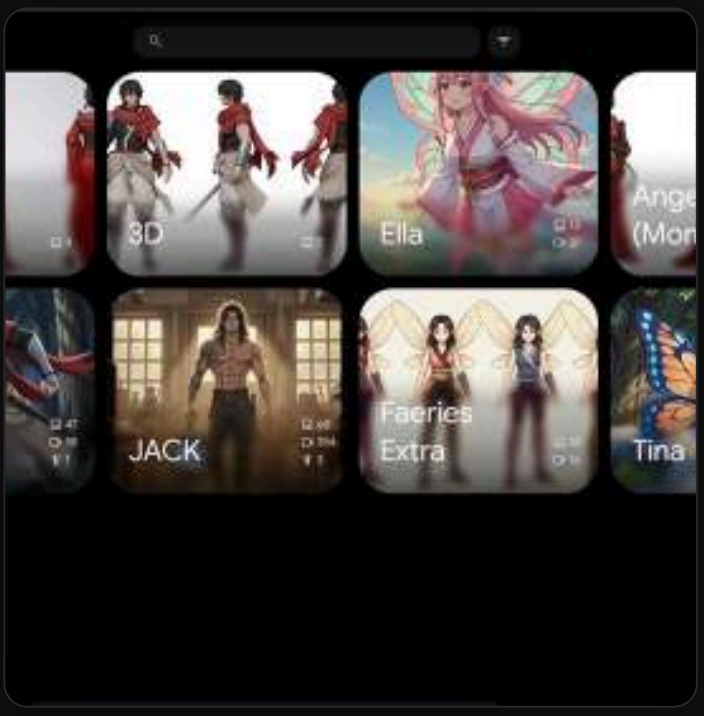

Visual Impact & Atmosphere Design

The Stroke of Night - Scene Highlights

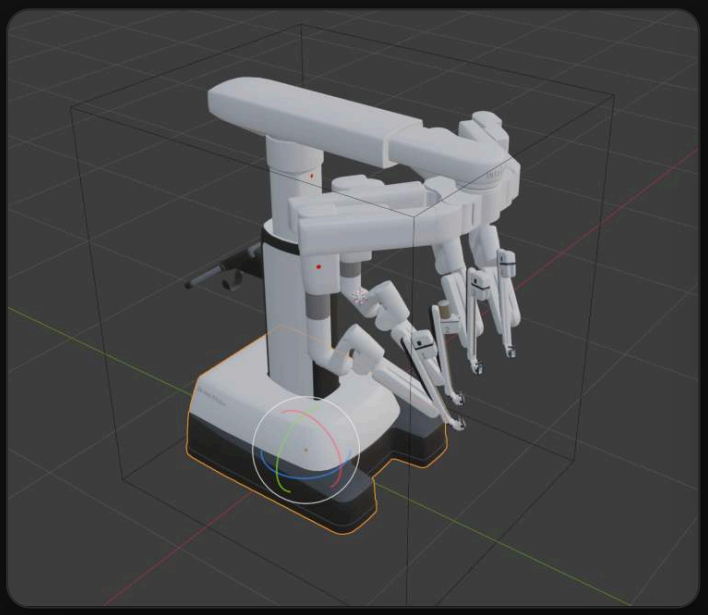

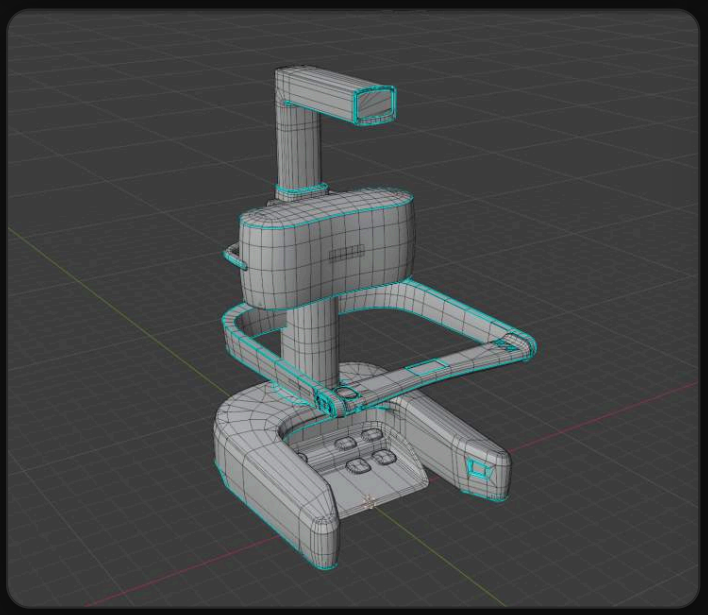

3D Medical Equipment (Virtual OR)

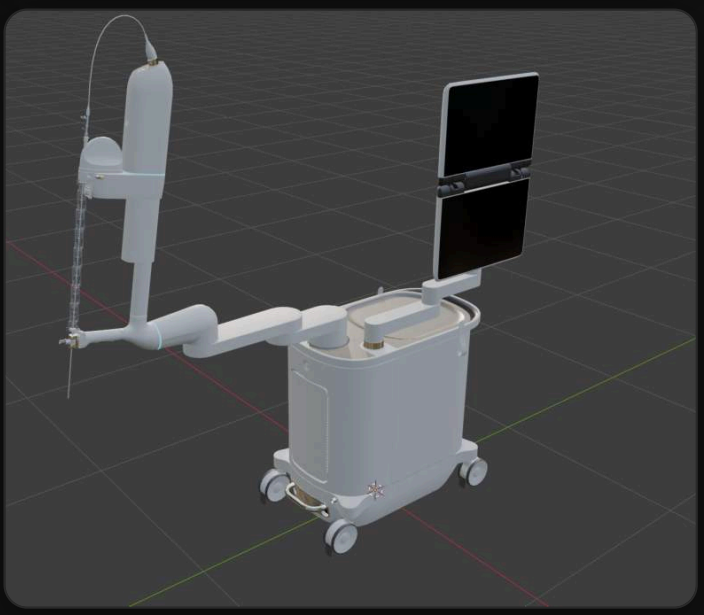

Intuitive Surgical (Interactive Project)

Interactive simulation project for surgical robotics (da Vinci systems). Responsible for high-precision 3D modeling and immersive Virtual Operating Room (OR) environments requiring microscopic anatomical accuracy.

3D Modeling & Texturing Details

High-Fidelity Medical Robot Modeling

Detailed breakdown of 3D robotic components showing meticulous PBR texturing, lighting response, and polygon optimization for high-performance real-time engine rendering.

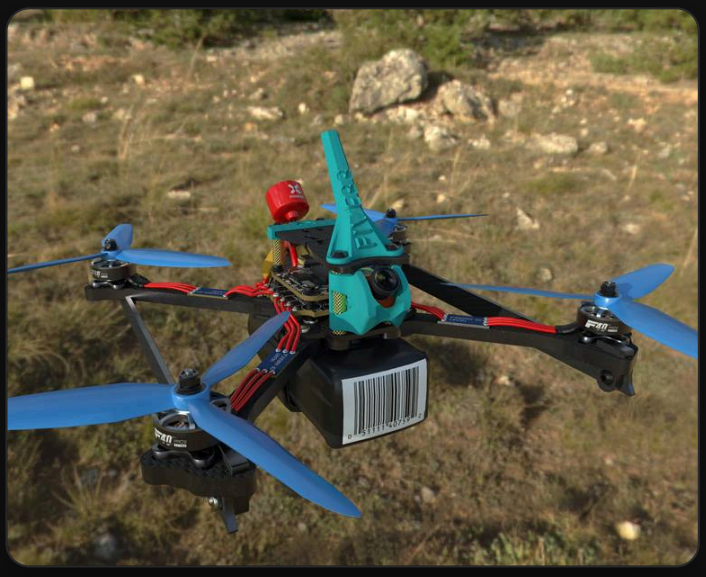

FPV Racing Drone 3D Engineering & Quads Topology

105+ Custom Hard-Surface Racing Frames & Canopies

Comprehensive collection of over 105 meticulously engineered 3D FPV quadcopter frames, freestyle drones, micro whoops, and aerodynamic canopies. Features clean quad-dominant topology, carbon-fiber material definition, component modularity, and real-time simulator optimizations.

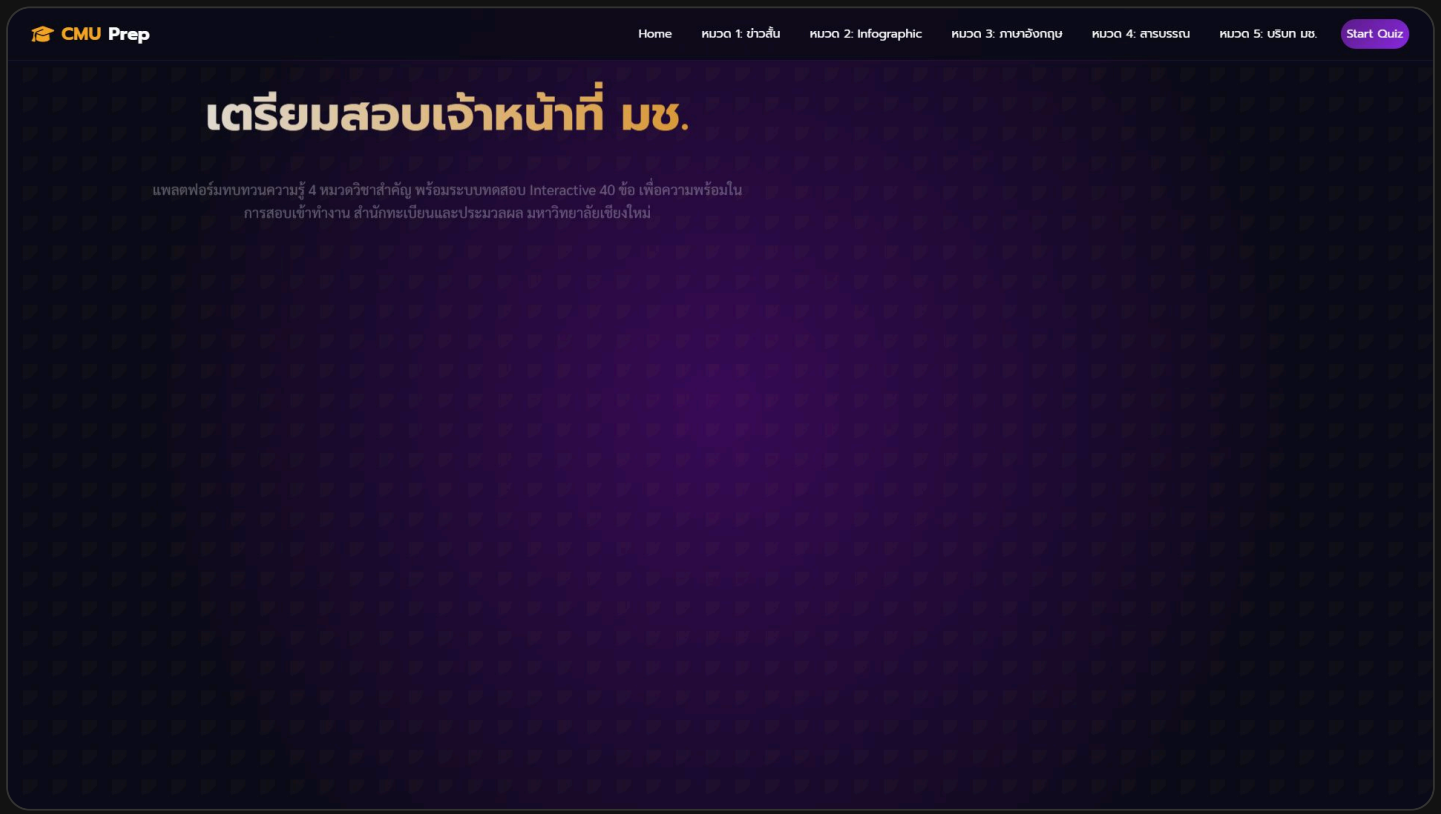

CMU Exam Preparation Interactive Web App

[Production EdTech Web App - Live at exam-prep-cmu.vercel.app ↗]

A purpose-built interactive web application platform created for university administrative examination preparation (Registration Office, Chiang Mai University).

Platform Features & System Design:

- **Interactive Testing Engine:** Comprehensive 180+ randomized questions pool with instant scoring, feedback, and study modes.
- **Automated PDF Guide Compiler:** Python-driven document generation producing structured, printable study guides.
- **Modern Responsive UI:** Clean, distraction-free educational interface optimized for mobile and desktop learners.

Community Management & Public Relations

Founder - NodNuat Translator (6.8k+ Followers) ↗ • www.nodnuattranslator.com ↗

As founder of the page, led communication strategy, web platform development, and active community management to foster strong engagement with the Thai gaming audience.

PR & Communications Highlights:

- Migrated platform infrastructure to Cloudflare Pages under official domain **www.nodnuattranslator.com**, integrating automated PromptPay slip verification and NAS private storage backup.
- Managed social channels, broadcasting project milestones to 6,800+ active followers.
- Handled community feedback and crisis/issue resolution with speed and transparency.
- Authored engaging tutorials and visual installation guides for mod distributions.
- Pioneered AI-driven localization workflows polished with meticulous human craftsmanship for Thai gamers.

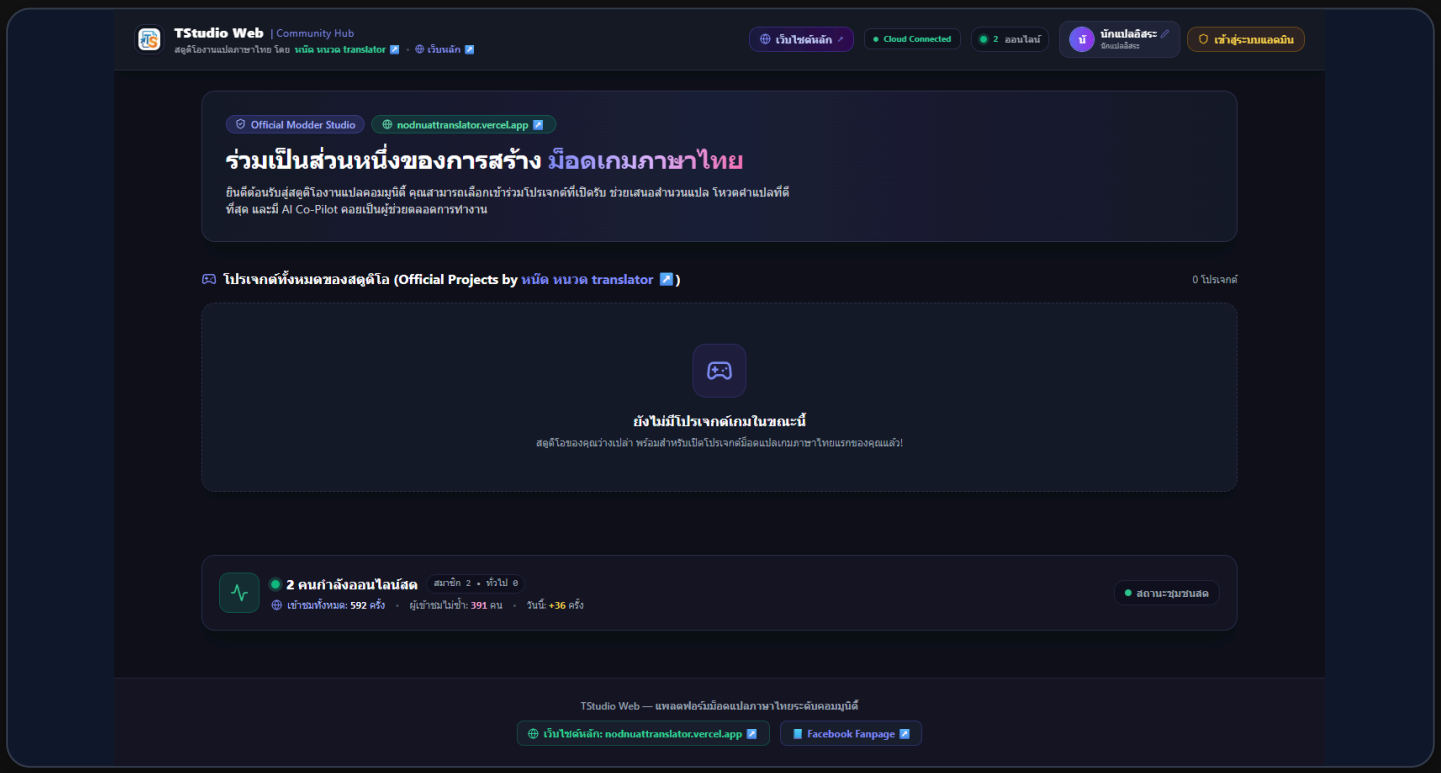

TStudio Web: Real-Time Collaborative Game Localization Platform

[Production Web App - Live at tstudioapp.pages.dev ↗](#) (Planned Domain: tstudioapp.is-a.dev)

A high-throughput collaborative game localization workspace engineered to empower translators, editors, and gaming communities to localize AAA titles simultaneously in real time.

Core Architectural Features:

- **Frontend Stack & Canvas Grid:** Built with React 18, TypeScript, TailwindCSS, and `@glideapps/glide-data-grid`. Renders massive localization tables (10,000+ string rows) on HTML5 Canvas at seamless 60fps.
- **Real-Time Live Collaboration:** Multi-user workspace with Google Sheets-style live presence avatars, active cell indicators, and typing synchronization.
- **Peer Review & Consensus Engine:** Community translation voting and administrative verification workflow featuring gold-highlight certification badges.
- **Project Card Sharing & Deep Linking:** Generate and share direct URL deep links pointing precisely to specific projects and row IDs.
- **Cloud Architecture:** Globally distributed deployment on Cloudflare Pages, backed by Supabase and Firebase for user authentication, glossary storage, and project metadata.

TimeTracker: Freelance Productivity & Invoicing Web App

[Production Web App - Live at timetracker-a63cb.web.app ↗]

Engineered and launched an enterprise-grade time-tracking and project accounting web application for freelancers and creative teams.

Core Architectural Features:

- **Frontend Stack:** Built with React 19, Vite, Lucide Icons, and responsive glassmorphism UI.
- **Financial Analytics:** Interactive revenue and project duration charts powered by Recharts.
- **Automated Invoicing Engine:** Configurable client billing, invoice numbering, and print-ready PDF export.
- **Cloud Persistence:** Real-time database synchronization and automated backups using Firebase Firestore.
- **Project Management:** Hierarchical sub-projects and project archiving lifecycle.

TimeTracker Cloud Platform

Seamless task time tracking, project revenue analytics, and one-click invoice generation.

Explore Live Web Application ->

Distributed Multi-Agent AI Studio & Infrastructure

Multi-PC LAN Compute Cluster, Python Automation & Private Cloud NAS

Architected a high-throughput smart studio infrastructure to orchestrate heavy generative AI workloads and private cloud data storage.

System Architecture Highlights:

- **Multi-PC AI Cluster:** Orchestrated background tasks across dual workstations (Main PC & AIPC1 via LAN/OpenSSH) for parallel ComfyUI rendering and inference.
- **Automated AI Media Pipelines:** Python automation pipeline driving AI speech generation (TTS/Minimax), prompt automation, and FFmpeg video concatenation.
- **Private Cloud & NAS:** High-speed Ugreen DXP2800 and Synology NAS integration with multi-partition SMB sharing and RaiDrive mount points.
- **Desktop Utilities:** Authored custom Python automation utilities (Adobe Creative Cloud multi-account switcher and AI API proxy balancers).

Home Dashboard & AI Studio Cluster

Distributed AI agents, high-speed LAN clustering, and private NAS storage.
